## ABOUT ME

There is couple principles which I use in my work routine.

1. Client always has to satisfied of work.
  - 1.1 Always trying to understand the business goals of client product.
  - 1.2 Help to create business plan for reach the goal.
2. Quality of work.
  - 2.1 During development always try to concentrate on high quality of product.
  - 2.2 Code always has to be testable and reusable
  - 2.3 Following of best practices and new technologies.
3. Be always in time.
  - 3.1 During planning of work it's always important to deliver in time
4. Communication is important.
  - 4.1 During development lifecycle client should be up to date with latest stable builds.
  - 4.2 Reports about our work.
5. Drink a cup of coffee during your break.
  - 5.1 Also, it's important communicate with coworkers for stress relief.
6. Strict to the strategy process.
  - 6.1 Always trying to follow selected strategy process (Scrum, Waterfowl a)

Except all principles above if you want to have all development process to go smoothly you can contact always to me. Because I have experience with:

1. Continues integration (Jenkins, AppCenter...)
2. Distributing release to clients.
3. Developing and covering code by tests
4. Publishing apps to the store.

Scope of technologies and programming languages which I'm using during development process:

1. Kotlin
2. Android
3. XML, SOAP
4. JAVA
5. Groovy
6. Gradle
7. JSON
8. GIT

Hope after all things which I have describe above you will enjoy working with me :)

By the way, I'm passion on learning French languages. I just started, but I really like this language :)
